

PORTOFOLIO

ABOUT

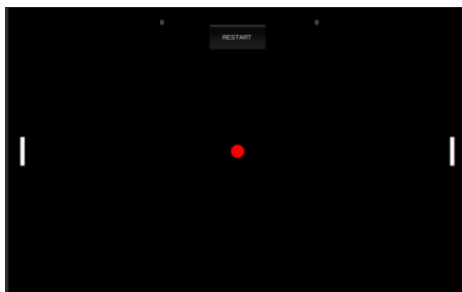

I am Emilisa, graduate of Master of Electrical Engineering at ITB, Digital Media and Game Technology option. Here are Game Projects that I have ever made.

COURSE PROJECT

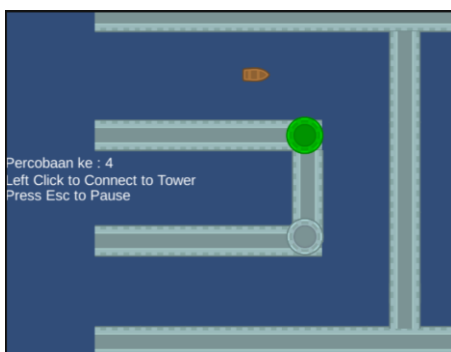

1. Flappy Bird (<https://emilisa707.itch.io/flappy-bird>)

2. Pong (<https://emilisa707.itch.io/pong>)

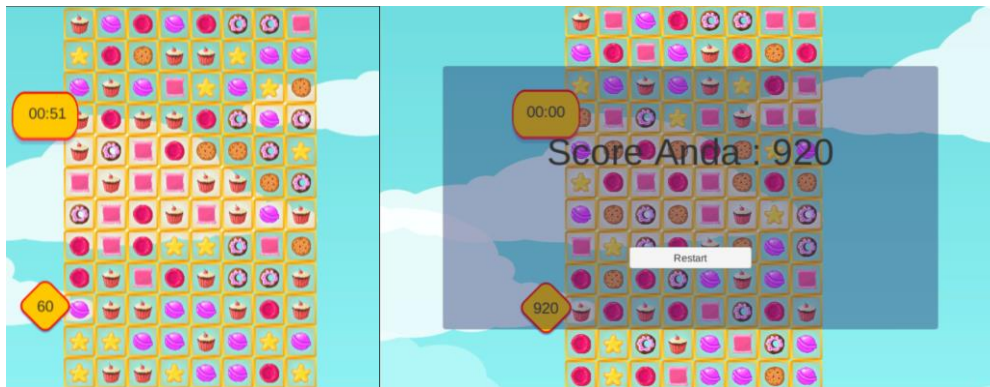

3. Magnetize (<https://emilisa707.itch.io/magnetize>)

4. Survival Shooter (<https://emilisa707.itch.io/survival-shooter>)

5. Match Three (<https://emilisa707.itch.io/match-three>)

GAME JAM PROJECT

1. LinmasSims (PC)

Linmas Simulators is an RPG genre game. The player plays the role of Linmas who is on duty at night to maintain the security of the village. Here I am a UI programmer. Manage the Start Menu Scene in which there are menus such as inventory, shop, billboard, credit and play menu.

To download this game, check this link: <https://emilisa707.itch.io/linmas>

Or to see the gameplay video, you can view it at the following link: <https://youtu.be/ALaNAZzl8ps>

2. Second Chance (PC)

Second Chance is a visual novel game that has 3 endings. But the ending is determined not from the choice/choice but from the player's actions. Here I play as the Main Programmer.

To download this game, you can check the link:

<https://globalgamejam.org/2020/games/second-chance-9>

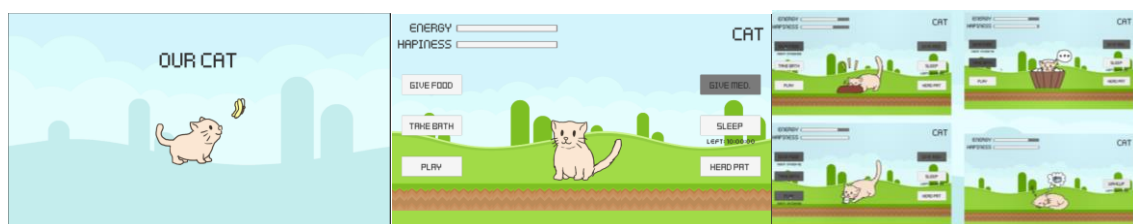

Or to see the video walkthrough, you can see the following

ASSIGNMENT PROJECT

1. Our Cat (Android)

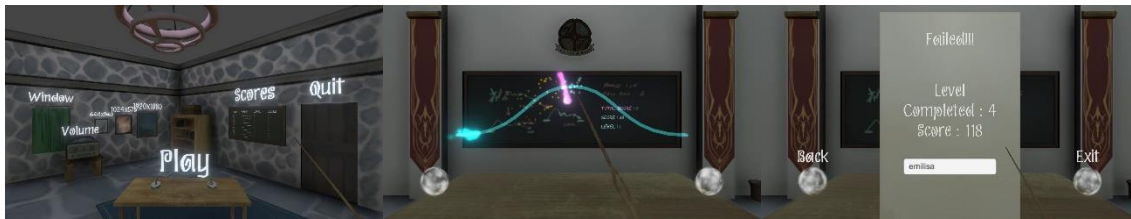

Our Cat is a game created with the aim of completing the Final Semester Project. Together with my group of friends, we made a tamagotchi-like game in which there are features of feeding, playing, bathing, stroking, and sleeping. For the video, check the following link: <https://youtu.be/OKcrm7QXdMQ>

2. BuzzWizzard (VR)

A game made with the aim of completing the Final Semester Project. Together with 4 friends in my group, we made a game that was controlled using Leap Motion. This game is similar to the game Buzz Wire, by featuring Wire, players

must run the ring using their hands and the ring must not touch the Wire.

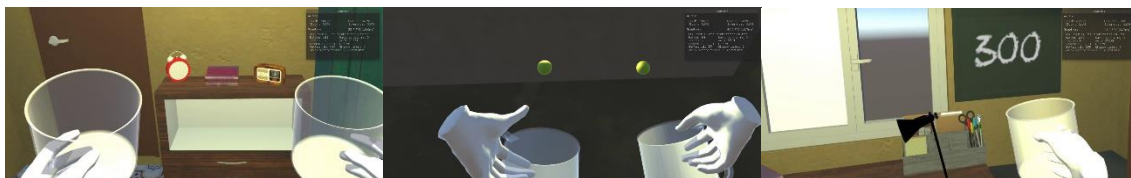

For the video, check the following link:

<https://drive.google.com/file/d/190hgZWDXXY5ul8JlBcx3d5XquZXYHANI/view?usp=sharing>

3. Bochor-bochor (VR)

A game made with the aim of completing the Final Semester Project. Together with 3 of my group of friends, we made a VR game where the player has to catch the falling raindrops using a glass, if there are many drops that cannot be caught the room will be flooded.

For the video, check the following link:

https://drive.google.com/file/d/1R_m1lbBw0D92KYB4FIIYxoz9eBywNku4/view?usp=sharing

4. AICat 3D

A game made with the aim of completing the Final Project (thesis). This game that I made myself is a virtual cat pet game whose behavior is made to almost resemble the behavior of cats in general. This game aims as a lesson for people who want to know how to take care of a cat that is good and right.

To download this game, you can go through: <https://emilisa707.itch.io/aicat>

OTHER PROJECT

1. Math from Home

A learning game for children to recognize, compose, compare and count numbers. This game is intended for a journal creation project. Here I became a main programmer. The game can be downloaded here: <https://drive.google.com/file/d/1-Xjnm50KesC6t7BR-ftfkWcBK3qsP-G/view?usp=sharing>
